DIVISION OF PLANT INDUSTRY BULLETIN No. 732

**THE TYPES OF AUSTRALIAN SPECIES OF THE SUB-FAMILY SCELIONINAE (HYMENOPTERA: SCELIONIDAE)**

by I. D. GALLOWAY, B.Sc.(Hons.)

**SUMMARY**

Two hundred and thirty-nine species in 37 genera are listed. The examination of type material has resulted in generic changes for 79 species. All synonymy, full bibliographic details and location of types are provided for each species and all synonyms are cross indexed in the text.

**I. INTRODUCTION**

The Scelioninae constitutes the largest subfamily of the Scelionidae and in Australia contains 239 species described in 37 genera. From an economic point of view this group has great significance as many are egg parasites of grasshoppers, locusts, crickets and bugs.

The first Australian species of the subfamily Scelioninae was described by Walker in 1839 from material collected by Charles Darwin. Since that time Kieffer, Crawford, Froggatt, Girault, Dodd and Szabo have all described species belonging to this subfamily. The vast majority of these species were described by A. P. Dodd from 1913 to 1939. A son of the well known lepidopterist F. P. Dodd, Alan Dodd published in his first Scelionid description at the age of 17. Dodd was later to become better known for his work in the biological control of prickly pear and it was finally the pressure of these duties which prevented him from continuing with his studies of the Australian microhymenoptera.

While overseas in 1973, the author had the opportunity to examine Scelionid types in the British Museum of Natural History and the Hope Museum, Oxford. In 1975, under a grant from the Australian Biological Resources Study, further Australian types were examined at the Australian National Insect Collection, Canberra, the New South Wales Department of Agriculture, the South Australian Museum and the Queensland Museum. The private collection of Mr. A. P. Dodd, which is now held in the Australian National Insect Collection, contained a number

of specimens labelled type but these represented only MS names and have, therefore, been omitted from this list. All Hymenoptera types previously deposited with the Macleay Museum, Sydney, are now on permanent loan to the Australian National Insect Collection, Canberra. The examination of types has resulted in generic changes being necessary for 79 species to align them with current generic concepts. The genera *Crematoscelio* Dodd 1913, *Mirobaeus* Dodd 1914, and *Notoscelio* Hickman 1968 are probably better regarded as Baeinae and *Neoteleia* Dodd 1913 as Telenominae and are excluded from this list.

For convenience, the following list has been divided into three sections. The first includes all new combinations and species retained under their old name either because the author feels they are correctly placed or cannot find sufficient evidence at this time to justify any change. The second section entitled 'Appendix' lists all species which appear to belong to new but as yet unnamed genera. The final section headed 'Species Incertae Sedis' includes species which should be placed in other genera but these cannot be identified either because of the condition of the types or the present uncertainty of the author regarding the new generic placement. All species included in the 'Appendix' and 'Species Incertae Sedis' are listed under their current name. All synonymy and full bibliographic details are provided for each species and all synonyms are cross indexed.

In the text the location of types is represented by the following abbreviations—  
 Australian National Insect Collection, Canberra—A.N.I.C.  
 British Museum (Natural History), London—B.M.N.H.  
 Hungarian Natural Science Museum, Budapest—H.N.S.M.  
 National Museum of Victoria, Melbourne—N.M.V.  
 New South Wales Department of Agriculture, Rydalmere—N.S.W. Dept. Agric.  
 Queensland Museum, Brisbane—Q.M.  
 South Australian Museum, Adelaide—S.A.M.  
 United States National Museum, Washington—U.S.N.M.

With the exception of the following types held in the Hungarian Natural Science Museum and the United States National Museum, the author has examined all types listed in the text—

*Dichoteleas pappi* Szabo (H.N.S.M.)  
*Scelio froggatti* Crawford (U.S.N.M.)  
*Scelio fulgidus* Crawford (U.S.N.M.)  
*Scelio pulchellus* Crawford (U.S.N.M.)

Type S.A.M. Holotype ♀ on a tag, antennae and forewings on a slide.

**australicus** (Dodd) comb.n.

*Macroteleia australica* Dodd, 1914b, p. 129; Kieffer, 1926, p. 541. *Baryconus australicus* (Dodd), 1933, p. 75.

Type S.A.M. Holotype ♂, 12202, on a tag, the slide of antennae and forewings missing.

**bellus** (Dodd) comb.n.

*Ceratoteleia bella* Dodd, 1913a, p. 142; 1913c, p. 175; Kieffer, 1926, p. 509. *Ceratoteleia venusta* Dodd, 1913a, p. 174; 1913c, p. 175. *Baryconus bellus* (Dodd), 1914e, p. 253, 1915a, p. 17. *Baryconus venustus* (Dodd), 1914e, p. 253.

Types S.A.M. Holotype ♀ of *bella* I1379 on a tag, antennae and forewings on a slide. Holotype ♀ of *venusta* on a tag I1436.

**brunneus** (Dodd) comb.n.

*Ceratoteleia brunnea* Dodd, 1913a, p. 141; Kieffer, 1926, p. 509. *Baryconus brunneus* (Dodd), 1914e, p. 253.

Type S.A.M. Holotype ♀ I1376 consists of only a slide of the antennae and forewings. Dodd (1913a) stated that "The body of this specimen was lost". However, there are three specimens on tags in the A.N.I.C. identified by Dodd as *Baryconus brunneus*.

**dulcis** (Dodd) comb.n.

*Baryconus dulcis* Dodd, 1914a, p. 82; 1914c, p. 108. *Ceratoteleia dulcis* (Dodd), Kieffer, 1926, p. 510.

Type S.A.M. Holotype ♀ on a tag, antennae and forewings on a slide.

**flavus** (Dodd) comb.n.

*Ceratoteleia flava* Dodd, 1913a, p. 140; Kieffer, 1926, p. 509. *Baryconus flavus* (Dodd), 1914e, p. 253.

Type S.A.M. Holotype ♂, I1374, on a tag; the slide of antennae and forewings missing.

**niger** (Dodd) comb.n.

*Ceratoteleia nigra* Dodd, 1913a, p. 175. *Baryconus niger* (Dodd), 1914e, p. 253. *Pegoteleia nigra* (Dodd), Kieffer, 1926, p. 515.

Type S.A.M. Holotype ♀, I1438, on a tag; the slide of head, antennae and forewings missing.

**perpulcher** (Dodd) comb.n.

*Baryconus perpulcher* Dodd, 1915b, p. 447.

Type S.A.M. Holotype ♀, I5171, on a tag; the slide of antennae and forewings missing.

**CALOTELEA Westwood 1837****delicatula** (Dodd) comb.n.

*Baryconus delicatulus* Dodd, 1914c, p. 107. *Ceratoteleia delicatula* (Dodd), Kieffer, 1926, p. 506.

Type S.A.M. Holotype ♀, on a tag; the slide of the antennae and forewings missing.

**exilis** nom. nov.

*Baryconus gracilis* Dodd, 1916, p. 26. *Calotelea gracilis* (Dodd) is pre-occupied by *Calotelea gracilis* (Nixon) (Masner, 1965, p. 69).

Type S.A.M. Holotype ♀, I5425, on a tag; the slide of the antennae and forewings is missing.

**fasciata** (Dodd) comb.n.

*Ceratoteleia fasciata* Dodd, 1913a, p. 143; Kieffer, 1926, p. 507. *Baryconus fasciatus* (Dodd), 1914e, pp. 253-254.

**III. APPENDIX**

This section contains species which appear to belong to new but as yet unnamed genera.

The following species belong to a genus whose type is *Gryon festivus* Kieffer:—

**Hadronotus variocellus** Girault*variocellus* Girault, 1926a.

Type Q.M. Holotype ♀ on a tag in company with an encyrtid. Antennae on a slide.

**Mirotelenomus fumosus** (Dodd)*Hadronotus fumosus* Dodd, 1914b, p. 130; Kieffer, 1926, p. 472 *Mirotelenomus fumosus* (Dodd), 1926a, p. 313.

Type S.A.M. Holotype ♂, I2204, on a tag; head, antennae and forewings on a slide.

**Mirotelenomus nigriceps** (Dodd)*Hadronotus nigriceps* Dodd, 1914a, p. 81; Dodd, 1914d, p. 164; Kieffer, 1926, p. 469. *Mirotelenomus nigriceps* (Dodd), 1926a, p. 313.

Type S.A.M. Holotype ♂ on a tag; head, antennae and forewings on a slide.

The following species were originally described by Dodd in the genus *Macroteleia* and the genus *Ceratoteleia*, but later transferred by him to *Baryconus*. They now appear to belong to a new genus in which the head and mesoscutum are smooth, shiny and largely sculptureless.

**Baryconus infuscatus** (Dodd)*Macroteleia infuscatus* Dodd, 1915a, p. 14. *Baryconus infuscatus* (Dodd), 1933, p. 75.

Type S.A.M. Holotype ♀ on a tag; antennae and forewings on a slide.

**Baryconus inornatus** (Dodd)

*Ceratoteleia inornata* Dodd, 1913a, p. 141, 175. *Macroteleia inornata* (Dodd), 1913c, p. 176. *Monoteleia inornata* (Dodd), Kieffer, 1926, p. 546. *Baryconus inornatus* (Dodd), 1933, p. 75.

*Types* S.A.M. Holotype ♂, I1375, on a slide in poor condition; allotype ♀ on a tag; head and antennae on a slide, forewings could not be located.

**Baryconus minimus** (Dodd)

*Macroteleia minima* Dodd, 1913a, p. 150; Kieffer, 1926, p. 542. *Baryconus minimus* (Dodd), 1933, p. 75.

*Type* S.A.M. Holotype ♀, I1392, on a tag; slide of antennae and forewings missing.

**Baryconus politus** (Dodd)

*Macroteleia polita* Dodd, 1914a, p. 78; Kieffer, 1926, p. 542. *Baryconus politus* (Dodd), 1933, p. 75.

*Type* S.A.M. Holotype ♀ on a tag; antennae and forewings on a slide.

**Baryconus setosus** (Dodd)

*Macroteleia setosa* Dodd, 1914b, p. 128; Kieffer, 1926, p. 541. *Baryconus setosus* (Dodd), 1933, p. 75.

*Type* S.A.M. Holotype ♂, I2201, on a tag; head, antennae and forewings on a slide.

**Baryconus simillimus** (Dodd)

*Macroteleia simillima* Dodd, 1915a, p. 14. *Baryconus simillimus* (Dodd), 1933, p. 75.

*Type* S.A.M. Holotype ♂ on a tag; head, antennae and forewings on a slide.

**Baryconus tricolor** (Dodd)

*Macroteleia tricolor* Dodd, 1913c, p. 176; Kieffer, 1926, p. 541. *Baryconus tricolor* (Dodd), 1933, p. 75.

*Type* S.A.M. Holotype ♂ on a tag; head, antennae and forewings on a slide.

**Baryconus unicolor** (Dodd)

*Macroteleia unicolor* Dodd, 1914b, p. 128; Kieffer, 1926, p. 541. *Baryconus unicolor* (Dodd), 1933, p. 75.

*Type* S.A.M. Holotype ♀ I2200, antennae on a slide; forewings could not be located.

**Baryconus varicornis** (Dodd)

*Macroteleia varicornis* Dodd, 1914b, p. 127; Kieffer, 1926, p. 540. *Baryconus varicornis* (Dodd), 1933, p. 75.

*Type* S.A.M. Holotype ♀, I2199, on a tag; slide of antennae and forewings missing.

#### IV. SPECIES INCERTAE SEDIS

Following are species which should be placed in another genus but the condition of the type precludes any decision on this placement at the moment.

**Baryconus imperfectus** Dodd

*imperfectus* Dodd, 1916, p. 27.

*Type* S.A.M. Holotype ♀, I5426, on a tag; slide of antennae and forewings missing.

**Baryconus nigricaput** Dodd

*nigricaput* Dodd, 1915a, p. 17.

*Type* S.A.M. Holotype ♂ on a tag; slide of head, antennae and forewings missing.

**Ceratoteleia pretiosa** Dodd

*Baryconus pretiosus* Dodd, 1914b, p. 126. *Ceratoteleia pretiosa* (Dodd), Kieffer, 1926, p. 510

*Type* S.A.M. Holotype ♂, I2196, on a tag; slide of head, antennae and forewings missing.

**Ceratoteleia variipes** (Dodd)

*Baryconus variipes* Dodd, 1914c, p. 108. *Ceratoteleia variipes* (Dodd), Kieffer, 1926, p. 508.

Type Q.M. Slide of holotype ♀ head, antennae and wings; body of specimen could not be located.

**Dibaryconus longipennis** (Dodd)

*Opisthacantha longipennis* Dodd, 1913c, p. 168. *Baryconus longipennis* (Dodd), 1914b, p. 126; Dodd, 1914d, p. 164. *Dibaryconus longipennis* (Dodd), Kieffer, 1926, p. 486.

Type S.A.M. Holotype ♂ on a slide; specimen in very poor condition.

**Dibaryconus sordidus** (Dodd)

*Baryconus sordidus* Dodd, 1914b, p. 126. *Dibaryconus sordidus* (Dodd), Kieffer, 1926, p. 486.

Type S.A.M. Holotype ♀, I2197, on a tag, head missing, slide of antennae and forewings missing.

**Dibaryconus trispinosus** (Dodd)

*Baryconus trispinosus* Dodd, 1914b, p. 127; Dodd, 1914d, p. 164. *Dibaryconus trispinosus* (Dodd), Kieffer, 1926, p. 487.

Type S.A.M. Holotype ♂, I2198, on a tag; slide of head, antennae and forewings missing.

**Hadronotus giraulti** (Dodd)

*Telenomoides giraulti* Dodd, 1913a, p. 169. *Hadronotus giraulti* (Dodd), 1914b, p. 129; Dodd, 1915a, p. 25; Kieffer, 1926, p. 471.

Type S.A.M. Holotype ♀, I1423, consists of a slide of an antenna and forewing only.

**Hadronotus goethei** Girault

*goethei* Girault, 1932.

Type Q.M. Slide of holotype ♀, antenna and forewing present; body of specimen could not be located.

**Hadronotus nigricornis** (Dodd)

*Telenomoides nigricornis* Dodd, 1913a, p. 170. *Hadronotus nigricornis* (Dodd), 1914b, p. 129; Girault, 1925, p. 183; Kieffer, 1926, p. 472.

Type S.A.M. Holotype ♀, 1428, on a slide in very poor condition.

**Hadronotus nigricoxa** Dodd

*nigricoxa* Dodd, 1913a, p. 179; Dodd, 1914c, p. 103; Dodd, 1915a, p. 32; Kieffer, 1926, p. 473.

Type S.A.M. Holotype ♀, I1447, slide of ♀ forewings present; body of specimen could not be located.

**Hadronotus striatus** Dodd

*striatus* Dodd, 1913a, p. 155; Kieffer, 1926, p. 470.

Type S.A.M. Holotype ♀, I1398, on a tag; the head is covered with glue and the wings are missing.

**Pegoteleia amabilis** (Dodd)

*Baryconus amabilis* Dodd, 1913b, p. 336; Dodd, 1915a, p. 16. *Pegoteleia amabilis* (Dodd), Kieffer, 1926, p. 515.

Type Q.M. Holotype ♀, HY1626, on a slide in company with a diapiiid—could not be located.

**Pegoteleia vulgaris** (Dodd)

*Baryconus vulgaris* Dodd, 1913b, p. 336; Dodd, 1915a, p. 17. *Pegoteleia vulgaris* (Dodd), Kieffer, 1926, p. 515.

Type Q.M. Holotype ♀, HY1627, on a slide—coverslip broken only part of a ♀ antenna remains.

**Plastogryon elegans** Dodd

*Plastogryon elegans* Dodd, 1914c, p. 94. *Plastogryon (Heterogryon) elegans* Dodd, Kieffer, 1926, p. 451.

Type S.A.M. Slide of holotype ♀ missing.

**Plastogryon fasciatipennis** Dodd

*Plastogryon fasciatipennis* Dodd, 1913a, p. 153; Masner, 1961, p. 159; *Plastogryon* (*Heterogryon*) *fasciatipennis* Dodd, Kieffer, 1926, p. 449.

Type S.A.M. Holotype ♂, I1395, on a tag; slide of head, antennae and forewings missing.

The following species whose types are intact should also be placed in another genus; however, this new generic placement is presently undecided—

*Baryconus discolor* Dodd, *B. vestigialis* Dodd, *B. vestitus* Dodd and *Hadronotus terrestris* Dodd were all collected on Lord Howe Island and have females with vestigial wings.

*Baryconus albicoxa* Dodd combines characters which are found in both *Calliscelio* and *Probaryconus*.

*Baryconus curtatus* Dodd has the habitus of *Opisthacantha* but there is no spine on the metanotum. This species could possibly be treated under *Duta* but I prefer to leave it undecided at the moment.

**Baryconus albicoxa** Dodd

*albicoxa* Dodd, 1915b, p. 446.

Types S.A.M. Holotype ♀ and allotype ♂, I5170, on a tag; antennae and forewings on a slide.

**Baryconus curtatus** Dodd

*curtatus* Dodd, 1930b, p. 27.

Types N.M.V. Holotype ♀ on a card. Q.M. Paratype ♀ missing from card.

**Baryconus discolor** Dodd

*discolor* Dodd, 1924, p. 177.

Types S.A.M. Holotype ♀, allotype ♂, I14573, on tags; paratype ♀ on a tag.

**Baryconus vestigialis** Dodd

*vestigialis* Dodd, 1924, p. 179.

Type S.A.M. Holotype ♀, I14574, on a tag. Paratype ♀ on a tag.

**Baryconus vestitus** Dodd

*vestitus* Dodd, 1924, p. 179.

Type S.A.M. Holotype ♀, I14575, on a tag.

**Hadronotus terrestris** Dodd

*terrestris* Dodd, 1924, p. 180.

Types S.A.M. Holotype ♀, and allotype ♂, I14577, on tags; 3 ♀ paratypes and 1 ♂ paratype on tags.

**V. ACKNOWLEDGEMENTS**

I should like to record my sincere thanks to the following persons for assistance in this work—Dr. R. W. Crosskey and other staff of the British Museum (Natural History); Dr. E. Riek, C.S.I.R.O., Division of Entomology; Mr. G. Gross, South Australian Museum; Mr. E. Dahms, Queensland Museum; Mr. M. Casimir and Mr. G. Baker, N.S.W. Department of Agriculture; Ms. H. Malcom, National Museum of Victoria; Dr. E. Exley, of the University of Queensland for kindly reading the manuscript; and Dr. L. Masner of the Bio-systematic Institute, Ottawa, for his generous assistance and encouragement.

Special thanks are also due to Miss J. Cardale, C.S.I.R.O., Division of Entomology, for her meticulous editing of the manuscript.

Financial assistance for this work was provided by the Australian Biological Resources Study.
