REPRINT INFORMATION – PLEASE READ!

For updated information please call 13 25 23 or visit the website www.deedi.qld.gov.au

This publication has been reprinted as a digital book without any changes to the content published in 1998. We advise readers to take particular note of the areas most likely to be out-of-date and so requiring further research:

• Chemical recommendations—check with an agronomist or Infopest www.infopest.qld.gov.au
• Financial information—costs and returns listed in this publication are out of date. Please contact an adviser or industry body to assist with identifying more current figures.
• Varieties—new varieties are likely to be available and some older varieties may no longer be recommended. Check with an agronomist, call the Business Information Centre on 13 25 23, visit our website www.deedi.qld.gov.au or contact the industry body.
• Contacts—many of the contact details may have changed and there could be several new contacts available. The industry organisation may be able to assist you to find the information or services you require.
• Organisation names—most government agencies referred to in this publication have had name changes. Contact the Business Information Centre on 13 25 23 or the industry organisation to find out the current name and contact details for these agencies.
• Additional information—many other sources of information are now available for each crop. Contact an agronomist, Business Information Centre on 13 25 23 or the industry organisation for other suggested reading.

Even with these limitations we believe this information kit provides important and valuable information for intending and existing growers.

This publication was last revised in 1998. The information is not current and the accuracy of the information cannot be guaranteed by the State of Queensland.

This information has been made available to assist users to identify issues involved in the production of tomatoes. This information is not to be used or relied upon by users for any purpose which may expose the user or any other person to loss or damage. Users should conduct their own inquiries and rely on their own independent professional advice.

While every care has been taken in preparing this publication, the State of Queensland accepts no responsibility for decisions or actions taken as a result of any data, information, statement or advice, expressed or implied, contained in this publication.
Contacts & REFERENCES

Want more information? This section helps direct you to other important providers and sources of tomato information. The Contacts directory contains the names and contact details of people and organisations serving the tomato industry. The References section contains a list of information that is useful reading for anyone involved in the industry.

Contents

Contacts

Grower associations, special product suppliers, consultants and technical information services

References

Books, articles, brochures, journals, magazines and newsletters
Contacts

Names are provided solely for helping readers to make contact. Inclusion of a person or organisation does not constitute an endorsement by the Department of Primary Industries or the authors, nor does it endorse a particular person or organisation over others not mentioned.

This section is up-to-date at the time of printing. If you supply special services to the tomato industry you may provide your details for consideration. Please forward your details to Agrilink, Department of Primary Industries, PO Box 5269 SCMC, Nambour QLD 4560. Phone: (07) 5444 9690; Facsimile: (07) 5444 9694; Int Code: +61 7

Grower associations

Queensland associations

The interests of the tomato industry in Queensland are represented through the tomato committee of Queensland Fruit & Vegetable Growers. This committee enables tomato growers to discuss and formulate industry policy.

Growers can speak from a position of strength through an accepted organisation. It is in the growers’ interests to join their local growers’ association. The address and meeting times of local associations and district delegates are available through:

Queensland Fruit & Vegetable Growers
PO Box 19
BRISBANE MARKET QLD 4106

Organic grower associations

Note: These organisations do not have the resources to provide a general advisory service about organic production. Their main function is to provide information about certification standards and processes. Special services are also provided to members after joining. Kits containing information on membership and certification standards and processes are available for purchase.

Consumer Affairs Queensland
Consumer Affairs officers manage the Trade Measurement Act 1990 and can provide current information on marking packages and the requirements for ensuring correct weight in all packages. You can locate your nearest office or obtain information by contacting them on Ph: (07) 3836 0411; Fax: (07) 3836 0424.

Forestry extension officers
Forestry extension officers are available for expert assistance with tree use on farms, including windbreak design and species selection, clearing, timber production and forest enrichment. The local DPI office can put you in contact with your nearest forestry officers.

Land conservation extension officers
Land conservation extension officers are available to provide expert assistance in planning farm layouts and providing advice on land management. The local Department of Natural Resources’ office can put you in contact with your nearest land conservation officers.
Water resources extension officers

Water resources advisory officers are available for expert assistance on all aspects of water use on farms including dam construction and maintenance, stream licensing, bore development, irrigation selection and design and water quality. They also provide advice on farm drainage problems. The local Department of Natural Resources’ office can put you in contact with your nearest water officers.

Library and literature search services

DPI Central Library in Brisbane provides several special information services that may be of interest to growers. These include:

- access to the library’s extensive book and journal collection;
- on-line public access catalogue (OPAC) terminals; (These terminals provide access to the DPI library catalogue and to material held in the State Library of Queensland.)
- literature searches (fee charged) from CD-ROM databases for a comprehensive range of subjects.

General enquiries can be directed to:
Ph: (07) 3239 3126; Fax: (07) 3239 3128

Other information sources

DPI Call Centre. To help you access DPI’s information services and products, ring the DPI Call Centre 13 25 23 from 8 a.m. to 8 p.m. Monday to Friday, excluding public holidays, for the cost of a local phone call.

Farmfax is a new DPI information service designed to allow quick access to new and frequently changing information on a range of topics. It provides information 24 hours a day, seven days a week for the cost of a phone call. Information can either be faxed back within minutes or mailed out the next day. You can ring the Farmfax number to receive an index, from which you can select the items you require.

The Farmfax telephone number is (07) 3222 2996.

AgriInfonet is a DPI marketing information access service aimed at assisting small to medium agricultural enterprises search for new business opportunities in export markets. Information on the range of services can be obtained from:

The AgriInfonet Project Manager
GPO Box 46
BRISBANE QLD 4001

A wide range of agricultural books and Agfacts is available through NSW Agriculture at the address above.

Contacts through the Yellow Pages

The following Yellow Pages headings cover the main topics for which contacts may be needed. Check the listings under the appropriate heading.
**Chemicals/fertilisers**
Chemicals, agricultural
Chemical suppliers
Fertilisers
Insecticides, herbicides and fungicides
Lime
Soil conditioners and treatments

**Consultants**
Farm and agricultural advisory services
Horticultural consultants

**Economics and marketing**
Fruit and vegetable wholesalers
Grain and produce
Transport services

**Equipment, irrigation, machinery**
Agricultural machinery
Engineers
Farm equipment and supplies
Instruments — scientific
Irrigation

**Manufacturers of harvesting and/or grading machinery**
Agricultural machinery
Carriers
Engineers, general
Engineers, manufacturing
Farm equipment and supplies

**Pesticides and spraying**
Aerial spraying
Fertiliser and/or insecticide spreading
Protective clothing
Spray equipment and/or supplies

**Postharvest handling and packaging**
Cold room builders/designers
Cold stores
Food processing and/or packing machinery
Fruit and vegetable packing
Grain and produce packaging materials
Refrigerated transport trucks and equipment
Scales and weighing equipment
References

Note: This is not an exhaustive list of references for tomatoes. It consists of references which the authors recommend as important sources of information and reading for the tomato grower. If you require more detailed information on a subject, use the literature search facilities available from most libraries.
