Reprint – information current in 1999

## REPRINT INFORMATION – PLEASE READ!

For updated information please call 13 25 23 or visit the website [www.dpi.qld.gov.au](http://www.dpi.qld.gov.au)

This publication has been reprinted as a digital book without any changes to the content published in 1999. We advise readers to take particular note of the areas most likely to be out-of-date and so requiring further research:

- Chemical recommendations—check with an agronomist or Infopest [www.infopest.qld.gov.au](http://www.infopest.qld.gov.au)
- Financial information—costs and returns listed in this publication are out of date. Please contact an adviser or industry body to assist with identifying more current figures.
- Varieties—new varieties are likely to be available and some older varieties may no longer be recommended. Check with an agronomist, call the Business Information Centre on 13 25 23, visit our website [www.dpi.qld.gov.au](http://www.dpi.qld.gov.au) or contact the industry body.
- Contacts—many of the contact details may have changed and there could be several new contacts available. The industry organisation may be able to assist you to find the information or services you require.
- Organisation names—most government agencies referred to in this publication have had name changes. Contact the Business Information Centre on 13 25 23 or the industry organisation to find out the current name and contact details for these agencies.
- Additional information—many other sources of information are now available for each crop. Contact an agronomist, Business Information Centre on 13 25 23 or the industry organisation for other suggested reading.

Even with these limitations we believe this information kit provides important and valuable information for intending and existing growers.

**This publication was last revised in 1999. The information is not current and the accuracy of the information cannot be guaranteed by the State of Queensland.**

This information has been made available to assist users to identify issues involved in the production of mangoes. This information is not to be used or relied upon by users for any purpose which may expose the user or any other person to loss or damage. Users should conduct their own inquiries and rely on their own independent professional advice.

## Mango grower associations

---

### Queensland associations

Queensland mango growers are represented on the Queensland Fruit & Vegetable Growers (QFVG) by the Other Fruits Sectional Group Committee (Mango Subcommittee). This enables growers to discuss and formulate industry policy. Growers can have input to the committee by joining a local growers' association affiliated with QFVG. Most local grower organisations are listed here.

The addresses and meeting times of local producer associations and the names of district delegates are also available through:

**Tree nurseries**

---

There are several suppliers of mango trees in all mango growing areas. Growers should check the classified advertisements in the Fruit and Vegetable News or in their local papers for suppliers of mango tree seedlings. As there is no nursery accreditation scheme for mango tree suppliers, ensure that the trees are free of disease. Serious diseases such as bacterial black spot can be introduced into an orchard through diseased nursery stock. Some of the nurseries that stock a range of mango varieties are listed here.

**Consumer Affairs Queensland**

Consumer Affairs officers manage the *Trade Measurement Act 1990*, and can provide current information on marking packages and the requirements for ensuring correct weight in all packages. You can locate your nearest office or obtain information by contacting them on: Ph: (07) 3836 0411; Fax: (07) 3836 0424

**Office of Fair Trading**

Packers can avoid fines under the *Trade Measurement Act 1990* by ensuring correct weight and labelling whenever packing fruit and vegetables for sale. Ring the trade measurement section on (07) 3836 0411 for guidelines for the packing of fruit and vegetables.

**Land vegetation management officers**

Land vegetation management officers are available for expert assistance with vegetation and tree management; including the retention and management of remnant vegetation, vegetation management planning, tree use on farms including windbreak design and species selection, clearing, non-industrial farm forestry and forest enrichment. Your local office of the Department of Natural Resources (DNR) can put you in contact with your nearest land vegetation management officer, where available.

### **Land conservation extension officers**

Land conservation extension officers are available in some districts to provide expert assistance in planning farm layouts and providing advice on land management. Your local office of the Department of Natural Resources (DNR) can put you in contact with your nearest land conservation officer, where available.

### **Farm financial counselling service**

In Queensland, DPI provides business advisory services to producers who are in difficulty from continuing environmental and economic pressures. Trained counsellors can help in the analysis of financial situations and the development of business plans. Your local DPI office or the DPI Call Centre, telephone 13 25 23, can put you in touch with your nearest financial counsellor.

### **Water extension advice**

Department of Natural Resources (DNR) officers can provide advice on most aspects of water use on farms including dam construction and maintenance, stream licensing, bore development, irrigation selection, water quality and farm drainage problems. Your local office of the Department of Natural Resources can put you in contact with the nearest office where this advice is available.

### **Library and literature search services**

DPI Central Library in Brisbane provides several special information services that may be of interest to growers. These include:

- access to the library's extensive book and journal collection;
- on-line public access catalogue (OPAC) terminals which provide access to the DPI library catalogue and to material held in the State Library of Queensland;
- literature searches (fee charged) from CD-ROM databases for a comprehensive range of subjects.

### **General enquires can be directed to:**
